

October 2025

2026 Formulary Updates Coming January 1 **Help Your Medicare Patients Prepare**

Every year, we make changes to the formulary, which is the list of covered drugs for Florida Blue Medicare patients, our members. This ensures that cost effective medications are available, such as generics and biosimilars. All changes are approved by the Centers for Medicare & Medicaid Services. The new formulary will become effective **January 1, 2026**.

To help support your Florida Blue Medicare patients, we will provide a report with a list of your patients and any drugs they currently take that will no longer be on the 2026 formulary. The report will include covered alternatives for your consideration, helping to facilitate a smooth transition.

This information will be sent securely through the Provider Portal Communication Center or via fax. To view the full Florida Blue Medicare formulary, visit [FloridaBlue.com/Medicare/forms](https://floridablue.com/Medicare/forms). Select your patient's plan on the left menu navigation, then click the *2026 Formulary* tab.
