BlueMedicare Premier Rx (PDP) 2025 Formulary (List of Covered Drugs)

Note to existing members: This formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take.

When this Drug List (formulary) refers to “we,” “us”, or “our,” it means Florida Blue or Florida Blue Medicare. When it refers to “plan” or “our plan,” it means BlueMedicare Premier Rx.

This document includes a Drug List (formulary) for our plan which is current as of April 21, 2025. For an updated Drug List (formulary), please contact us. Our contact information, along with the date we last updated the Drug List (formulary), appears on the front and back cover pages.

You must generally use network pharmacies to use your prescription drug benefit. Benefits, formulary, pharmacy network, and/or copayments/coinsurance may change on January 1, 2026, and from time to time during the year.

What is the BlueMedicare Premier Rx Formulary?

In this document, we use the terms Drug List and formulary to mean the same thing. A formulary is a list of covered drugs selected by our plan in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. Our plan will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a BlueMedicare Premier Rx network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your *Evidence of Coverage*.

Can the formulary change?

Most changes in drug coverage happen on January 1, but we may add or remove drugs on the formulary during the year, move them to different cost-sharing tiers, or add new restrictions. We must follow the Medicare rules in making these changes. Updates to the formulary are posted monthly to our website here: www.floridablue.com/medicare.

Changes that can affect you this year: In the below cases, you will be affected by coverage changes during the year:

- **Immediate substitutions of certain new versions of brand name drugs. and original biological products.** We may immediately remove a drug from our formulary Drug List if we are replacing it with a certain new version of that drug that will appear on the same or lower cost-sharing tier and with the same or fewer restrictions. When we add a new version of a drug to our formulary, we may decide to keep the brand-name drug or original biological product on our formulary, but immediately move it to a different cost-sharing tier or add new restrictions.

We can make these immediate changes only if we are adding a new generic version of a brand name drug, or adding certain new biosimilar versions of an original biological product, that was already on the formulary (for example, adding an interchangeable biosimilar that can be substituted for an original biological product by a pharmacy without a new prescription).

If you are currently taking the brand-name drug or original biological product, we may not tell you in advance before we make an immediate change, but we will later provide you with information about the specific change(s) we have made.

If we make such a change, you or your prescriber can ask us to make an exception and continue to cover for you the drug that is being changed. For more information, see in the section below entitled “How do I request an exception to the BlueMedicare Premier Rx Formulary?”

Some of these drug types may be new to you. For more information, see the section below titled “What are original biological products and how are they related to biosimilars?”

- **Drugs removed from the market.** If a drug is withdrawn from sale by the manufacturer or the Food and Drug Administration (FDA) Administration determines to be withdrawn for safety or effectiveness reasons, we may immediately remove the drug from our formulary and later provide notice to members who take the drug.
- **Other changes.** We may make other changes that affect members currently taking a drug. For instance, we may add a new generic drug to replace a brand-name drug currently on the formulary, or add new restrictions or add a new biosimilar to replace an original biological product currently on the formulary, or add new restrictions or move a drug we are keeping on the formulary to a higher cost-sharing tier or both after we add a corresponding drug. We may make changes based on new clinical guidelines. If we remove drugs from our formulary, add prior authorization, quantity limits and/or step therapy restrictions on a drug or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective. Alternatively, when a member requests a refill of the drug, they may receive a 31-day supply of the drug and notice of the change.

If we make these other changes, you or your prescriber can ask us to make an exception for you and continue to cover the drug you have been taking. The notice we provide you will also include information on how to request an exception, and you can also find information in the section below entitled “How do I request an exception to the BlueMedicare Premier Rx Formulary?”

Changes that will not affect you if you are currently taking the drug. Generally, if you are taking a drug on our 2025 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2025 coverage year except as described above. This means these drugs will remain available at the same cost-sharing and with no new restrictions for those members taking them for the remainder of the coverage year. You will not get direct notice this year about changes that do not affect you. However, on January 1 of the next year, such changes would affect you, and it is important to check the formulary for the new benefit year for any changes to drugs.

The enclosed formulary is current as of April 21, 2025. To get updated information about the drugs covered by our plan, please contact us. Our contact information appears on the front and back cover pages.

Our plan provides monthly updates of the formulary on our website (www.floridablue.com/medicare) and in print as needed. The paragraphs that follow will explain how you will be notified in the event of certain changes.

Our plan will only remove Part D drugs from our formulary, move covered Part D drugs to a less preferred tier status, or add utilization management requirements 60 days after the beginning of the contract year associated with the annual election period, and only if these changes are approved by CMS. If we should make such formulary changes, members currently taking the affected drug are exempt from the formulary change for the remainder of the contract year except as described above.

Prior to removing a covered Part D drug from its formulary, or making any change in the preferred or tiered cost-sharing status of a covered Part D drug, our plan will either:

- Provide direct written notice to affected enrollees at least 30 days prior to the date the change becomes effective; or

- At the time an affected enrollee requests a refill of the Part D drug, provide such enrollee with a 31-day supply of the Part D drug under the same terms as previously allowed and written notice of the formulary change.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 1. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, “Cardiovascular Agents.” If you know what your drug is used for, look for the category name in the list that begins on page 1. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index that begins on page 97. The Index provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

Our plan covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs cost less than brand-name drugs.

What are original biological products and how are they related to biosimilars?

On the formulary, when we refer to drugs, this could mean a drug or a biological product. Biological products are drugs that are more complex than typical drugs. Since biological products are more complex than typical drugs, instead of having a generic form, they have alternatives that are called biosimilars. Generally, biosimilars work just as well as the original biological product and may cost less. There are biosimilar alternatives for some original biological products. Some biosimilars are interchangeable biosimilars and, depending on state laws, may be substituted for the original biological product at the pharmacy without needing a new prescription, just like generic drugs can be substituted for brand name drugs.

For discussion of drug types, please see the Evidence of Coverage, Chapter 3, Section 3.1, “The ‘Drug List’ tells which Part D drugs are covered” for BlueMedicare Premier Rx.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** Our plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from our plan before you fill your prescriptions. If you don’t get approval, we may not cover the drug.
- **Quantity Limits:** For certain drugs, our plan limits the amount of the drug that we will cover. For example, our plan provides 30 tablets per prescription for Januvia. This may be in addition to a standard one-month or three-month supply.
- **Step Therapy:** In some cases, our plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A

and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 1. You can also get more information about the restrictions applied to specific covered drugs by visiting our website. We have posted online a document that explains our prior authorization and step therapy restrictions. You may also ask us to send you a copy. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You can ask us to make an exception to these restrictions or limits or for a list of other, similar drugs that may treat your health condition. See the section, “How do I request an exception to the BlueMedicare Premier Rx formulary?” on page iv for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Member Services and ask if your drug is covered.

If you learn that our plan does not cover your drug, you have two options:

- You can ask Member Services for a list of similar drugs that are covered by our plan. When you receive the list, show it to your doctor and ask them to prescribe a similar drug that is covered by our plan.
- You can ask us to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the Blue Medicare Premier Rx Formulary?

You can ask our plan to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover a drug even if it is not on our formulary. If approved, this drug will be covered at a pre-determined cost-sharing level, and you would not be able to ask us to provide the drug at a lower cost-sharing level.
- You can ask us to waive a coverage restriction including prior authorization, step therapy, or a quantity limit on your drug. For example, for certain drugs, we limit the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover a greater amount.
- You can ask us to cover a formulary drug at a lower cost-sharing level, unless the drug is on the specialty tier. If approved, this would lower the amount you must pay for your drug.

Generally, we will only approve your request for an exception if the alternative drugs included on the plan’s formulary, the lower cost-sharing drug or applying the restriction would not be as effective for you and/or would cause you to have adverse effects.

You or your prescriber should contact us to ask us for a formulary exception, including an exception to a coverage restriction. **When you request an exception, your prescriber will need to explain the medical reason why you need the exception.** Generally, we must make our decision within 72 hours of getting your prescriber’s supporting statement. You can ask for an expedited (fast) decision if you believe, and we agree, that your health could be seriously harmed by waiting up to 72 hours for a decision. If we agree, or if your prescriber asks for a fast decision, we must give you a decision no later than 24 hours after we get your prescriber’s supporting statement.

What can I do if my drug is not on the formulary or has a restriction?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but has a coverage restriction, such as prior authorization from us before you can fill your prescription. You should talk to your prescriber about requesting a coverage decision to show that you meet the criteria for approval, switching to an alternative drug that we cover, or requesting a formulary exception so that we will cover the drug you take. While you and your doctor determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or has a coverage restriction, we will cover a temporary 31-day supply. If your prescription is written for fewer days, we'll allow refills to provide up to a maximum 31-day supply of medication. If coverage is not approved after your first 31-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility, and you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan, we will cover a 31-day emergency supply of that drug while you pursue a formulary exception.

Circumstances exist in which unplanned transitions for current members could arise and in which prescribed drug regimens may not be on the formulary. These circumstances usually involve level of care changes in which a member is changing from one treatment setting to another. For these unplanned transitions, you must use our exceptions and appeals process. Coverage determinations and redeterminations will be processed as expeditiously as your health condition requires.

When a member is admitted to or discharged from a Long-Term Care (LTC) facility, he or she does not have access to the remainder of the previously dispensed prescription. We will ensure you have a refill upon admission or discharge. A one-time override of the "refill too soon" edits, is provided, for each medication which would be impacted due to a member being admitted to or discharged from an LTC facility. Early refill edits are not used to limit appropriate and necessary access to a member's Part D benefit, and such members are allowed to access a refill upon admission or discharge.

Our Plan’s Formulary

The formulary that begins on page 1 provides coverage information about the drugs covered by our plan. If you have trouble finding your drug in the list, turn to the Index that begins on page 97.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., LANTUS) and generic drugs are listed in lower-case italics (e.g., *metformin*).

The information in the Requirements/Limits column tells you if our plan has any special requirements for coverage of your drug.

If Quantity Limits apply to a drug, the restriction amounts are shown in the listing on each page.

All drugs included in this formulary, with the exception of limited distribution drugs, are available through our mail-order services. Limited distribution drugs are indicated in the formulary with an asterisk (*). Contact us for more details.

Initial Coverage Stage

The copayment/coinsurance amounts that you pay for a one-month (31-day) supply of drugs in each Drug Tier are shown below.
