

## LetsGetChecked to Assist with 2024 Medicare Advantage Colorectal Cancer Screening

Beginning this month, LetsGetChecked<sup>®1</sup>, a supplier of health screening kits, will be assisting Florida Blue Medicare with the **fecal immunochemical test (FIT) colorectal cancer screening initiative for 2024**. This initiative runs through June and aims to provide in-home FIT kits and test results for our Florida Blue Medicare Advantage members, your patients.

LetsGetChecked will send kits to members in June. We will also rely on Quest Diagnostics to send members a FIT kit this month. Engaging both suppliers will help increase our member in-home FIT return rate.

Providers will receive notifications when patients receive a FIT kit and when test results are issued. Additionally, you will receive a monthly patients' results report from Florida Blue Medicare.

Approximately three weeks after delivery, we will reach out to members who have not returned their FIT kit with up to two reminder emails and a phone call, if needed. Please encourage your Florida Blue Medicare Advantage patients to complete the FIT kit promptly.

Thank you for your continued support and collaboration in helping our members achieve better health.

<sup>1</sup> Florida Blue Medicare has entered into a HIPAA-compliant Business Associate Agreement with LetsGetChecked. LetsGetChecked is an independent company that provides health screening results to Florida Blue Medicare members. HIPAA permits a covered entity, such as your practice or Florida Blue Medicare to share PHI with another covered entity or its business associate for the purpose of care coordination. See 45 C.F.R. § 164.501 and 45 C.F.R. § 164.506(c)(4).
