

August 2024

Sign Up for Florida Blue's Next HEDIS Innovations Webinar on October 29 Presented by the Federal Employee Program

In support of Florida Blue's mission to help people and communities achieve better health, we are continuing the webinar series presented by our Federal Employee Program® (FEP). The series is designed to summarize specific Healthcare Effectiveness Data and Information Set (HEDIS®¹) measures and share best practices.

Our next HEDIS Innovations Webinar will take place Tuesday, October 29 from noon – 1:15 p.m. Eastern Time.

Join us for this interactive session led by the Florida Blue FEP Senior Medical Director, which will include time for questions and answers. You will learn about the latest changes, tools you can use to close care gaps, and much more. This, in turn, may help you implement National Committee on Quality Assurance² best practices in your office. We encourage physicians, mid-level providers, nurses, population health staff, clinical training staff, quality care team members, and coding managers to attend.

About Our Third Webinar

The third webinar in our series will focus on **Cardiovascular Disease: Statin Use in Patients with Cardiovascular Disease (SPC)** and **Asthma Medication Ratio (AMR)**. We will discuss the importance of medication management, strategies for improving medication adherence, and new features within the Florida Blue provider portal to better support non-adherent members.

To register for the October 29 HEDIS Innovations Webinar, [click here](#).

Looking Ahead

We are pleased to announce the continuation of our webinar series in 2025. Thanks to your engagement and positive feedback regarding this year's events, our new series will kick off in April 2025. Participants in the October 2024 webinar will be invited to suggest topics for our upcoming series. We highly value your feedback and look forward to incorporating your suggestions into future sessions.
