

## 2025 Medical Record Review Results Now Available

Each year, we conduct a review of primary care practices' medical records, formally known as the Documentation of Care (DOC) Medical Record Review program. This initiative is intended to help improve record-keeping practices to foster patient safety and improve continuity, coordination, and transition of care.

The DOC Medical Record Review program follows regulatory requirements by the National Committee for Quality Assurance (NCQA), the Agency for Health Care Administration, and the Florida Administrative Code, Standards for Practice for Medical Doctors. The DOC process aligns with the NCQA review of the plan's medical record files for survey regulatory purposes.

### Methodology and Results

A team of registered nurses conducted the annual medical record review. A sample of records from our HMO lines of business was randomly pulled from standardized tables. The population sample included Health Options, Inc., Truli for Health, and Florida Blue Medicare Advantage HMO plans. Primary care providers included in the medical record audit will receive results along with the medical record [guidelines](#) in the mail.

Our DOC 2025 Medical Record Review overall average score is 92.04%. This score is shown in the table below while more details of the results are available [here](#).

Description of 50 Medical Records	Total	Percent
Number of medical records scored 100%	12	24%
Number of medical records scored 90%-99%	33	66%
Number of medical records scored 89% or less	5	10%
Average overall score = 92.04		

### Compliance Improvement Opportunities

This year's results are 4.2 percentage points lower than the 2024 results of 96.24%. We encourage you to continue to seek ways to improve your medical record documentation practices. **Please review the following opportunities for improving documentation compliance.** Thank you for your ongoing support of the DOC program.

### Opportunities for Improved Compliance

The Florida Blue DOC 2025 Medical Record Review audit identified the following areas of opportunity for improved compliance:

HMO coverage is offered by Truli for Health and Florida Blue HMO, affiliates of Florida Blue. Florida Blue offers health insurance. These companies are independent licensees of the Blue Cross and Blue Shield Association.

- **Advance Directives**

To meet our regulatory responsibilities, we check to see if advance directives, including a living will, are documented in the member's medical records. Do you know your patients' wishes if they face a health crisis? We encourage you to ask your patients who are 18 years or older, if they have advance directives or living wills. Please be sure to record their responses (yes or no) in their medical records and request a copy of the advance directive and/or living will to keep in their medical file.

- **Documentation of Substance Use Inquiry and Counseling in the Medical Records for Persons 12 Years of Age and Older**

Routine medical care offers a valuable opportunity for practitioners to identify potential substance use issues in patients. Screening enables early intervention and can positively impact patients' overall health and well-being.

- **Preventive Services/Screenings Recommended**

During the annual well care visit, the practitioner has an opportunity to assess and recommend preventive screenings for the patient. The patient may express reluctance or fear having certain ones, such as the colorectal cancer screening. The practitioner office may offer various screening options for colon cancer. The practitioner can emphasize the importance of these screenings for early detection/treatment.

### **Your Help is Critical**

Thank you for ensuring this valuable information is captured in your patients' medical records.

Results and guidelines were mailed to primary care providers included in the medical record audit. If you have questions, please email our Quality Management Department at [qualitymanagementdepartment@bcbsfl.com](mailto:qualitymanagementdepartment@bcbsfl.com).
