Disclosure Statement

The Truli for Health HIPAA Transaction Standard Companion Guide for EDI Transactions Technical Reports, Type 3 (TR3) provides guidelines for submitting electronic batch transactions. Because the HIPAA ASC X12-TR3s require transmitters and receivers to make certain determinations /elections (e.g., whether, or to what extent, situational data elements apply) this Companion Guide documents those determinations, elections, assumptions or data issues that are permitted to be specific to Truli for Health business processes when implementing the HIPAA ASC X12 5010 TR3s.

This Companion Guide does not replace or cover all segments specified in the HIPAA ASC X12 TR3s. It does not attempt to amend any of the requirements of the TR3s or impose any additional obligations on trading partners of Truli for Health that are not permitted to be imposed by the HIPAA Standards for Electronic Transactions. This Companion Guide provides information on Truli for Health specific codes relevant to Truli for Health business processes, rules and situations that are within the parameters of HIPAA. Readers of this Companion Guide should be acquainted with the HIPAA ASC X12 TR3s, their structure and content.

This Companion Guide provides supplemental information that exists between Truli for Health and its trading partners. Trading partners should refer to their trading partner agreement for guidelines pertaining to Availity LLC, legal conditions surrounding the implementation of the EDI transactions and code sets. However, trading partners should refer to this Companion Guide for information on Truli for Health business rules or technical requirements regarding the implementation of HIPAA-compliant EDI transactions and code sets.

Nothing contained in this Companion Guide is intended to amend, revoke, contradict or otherwise alter the terms and conditions of your applicable trading partner agreement. If there is an inconsistency between the terms of this Companion Guide and the terms of your applicable trading partner agreement, the terms of the trading partner agreement will govern. If there is an inconsistency between the terms of this Companion Guide and any terms of the TR3, the relevant TR3 will govern with respect to HIPAA edits and this Companion Guide will govern with respect to business edits.

1 INTRODUCTION

The Health Insurance Portability and Accountability Act (HIPAA) requires the health care industry in the United States to comply with the electronic data interchange (EDI) standards as established by the Secretary of Health and Human Services. The ASC X12 005010X222A1 is the established standard for Health Care Professional Claims (837 P).

1.1 Scope

This 837 Companion Guide was created for Truli for Health trading partners to supplement the 837 TR3. It describes the data content, business rules, and characteristics of the 837 transaction. If you submit your transactions through Availity, please also refer to the Availity EDI guide essentials.availity.com.

1.2 Overview

The Technical Report Type 3 Guide (TR3) for the 837 P Health Care Professional Claim transactions specifies in detail the required formats. It contains requirements for the use of specific segments and specific data elements within segments and was written for all health care providers and other submitters. It is critical that your software vendor or IT staff review this document carefully and follow its requirements to send HIPAA-compliant files to Truli for Health via your vendor.

Billing Requirements for Ancillary Providers

If ancillary providers have a Truli for Health provider agreement that does not require the registration of employed health care providers, then only the billing provider information should be populated on the claim. If the Truli for Health provider agreement requires registration of employed health care providers, then the rendering and billing NPI should be billed appropriately on claims.

Important Note: When billing Referring Physician Information, the referring physician's NPI is always required for Truli for Health.

1. The following is a sample of necessary provider billing information required on the 837 P:

- Ancillary provider with registered employed health care providers
- Rendering provider NPI (loop 2310B & 2420A)
- Billing provider NPI (loop 2010AA)

- Ancillary provider with no registered employed health care providers:
- Rendering provider NPI – Blank
- Billing provider NPI (loop 2010AA)

Helpful Tips

How to Avoid Provider Identification Errors

Below are reminders to help you reduce the number of WEBV040 and WEBV042 claims errors displayed when claim data (or information) does not match information registered with Truli for Health.

A. Billing Provider Section

This section is used to provide information regarding the billing provider for services rendered. It should match the name written on the check or electronic funds transfer from Truli for Health.

- i. **OPTION One (1):** If you are registered as a group provider (PA, LLC, etc.) with Truli for Health and you want to bill as a group provider, enter the appropriate group name, Tax ID number and the group NPI (type 2).
 1. **THE MATCH:** Group Name matches Group NPI matches Group Tax ID.
- ii. **OPTION Two (2):** If you are registered as an individual provider with Truli for Health and you are billing as an individual provider, please enter your name, Social Security Number and your individual NPI (type 1).
 1. **THE MATCH:** Individual Name matches Individual NPI matches Individual Social Security Number

B. Rendering Provider Section

This section is used to provide information regarding who performed the services. It is the provider who actually sees the patient.

¹Availity, LLC, is a multi-payer joint venture company. For more information or to register, visit essentials.availity.com.

Truli for Health is a trade name of BeHealthy Florida, Inc., an Independent Licensee of the Blue Cross and Blue Shield Association.

- iii. OPTION One (1): If you billed as an organization (PA, LLC, etc.) list the name of the rendering individual provider and the rendering individual NPI.
- iv. OPTION Two (2): If you billed as an individual, do not list a rendering provider. This would be redundant as the billing individual would be the same as the rendering individual. Submitting redundant information can cause a different provider correctable error.

Below is an example to assist you in understanding the appropriate entry of billing and rendering provider information to reduce the number of returned claims.

Availity, LLC, is a multi-payer joint venture company. For more information or to register, visit essentials.availity.com.

C. Billing as a Group Provider – OPTION One (1)

If you are billing as a group provider, (PA, LLC, etc.), the NPI must be the Group NPI (type 2) along with the appropriate Tax ID number for the group.

Please note that the Billing Section is for the entity BILLING for the services. The Rendering Provider Section is for the provider who PERFORMED the services.

Correct Entry (THE MATCH):

This example shows how the information submitted matches data registered with TruLi for Health. The Group Name matches Group NPI which matches Group Tax ID number and all match TruLi for Health provider files.

Incorrect Entries (THE MISMATCH):

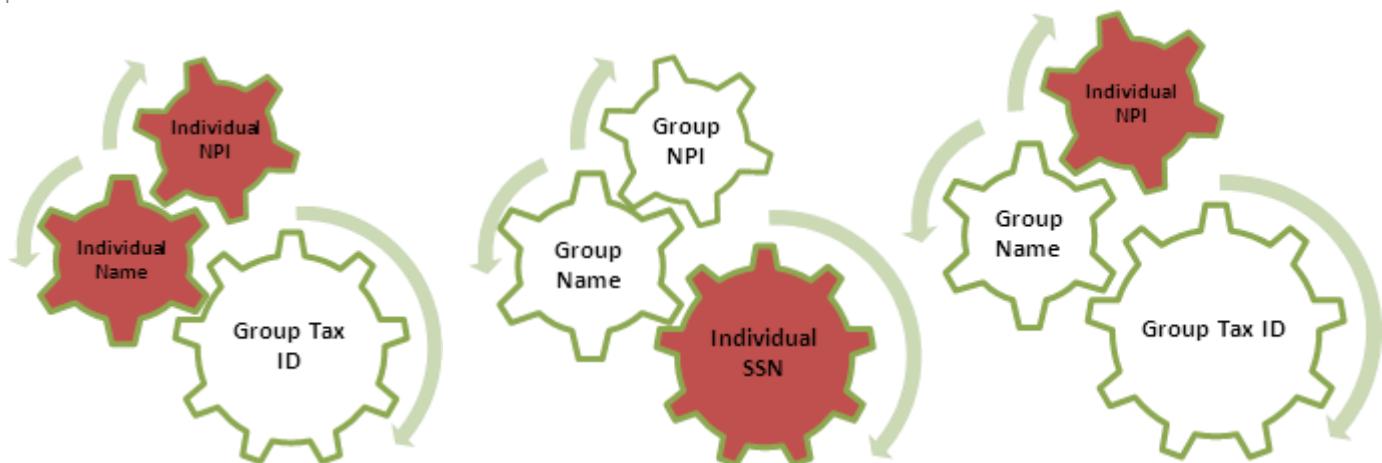

Below are examples of information that will result in a mismatch of data causing a WEBV040 provider correctable error ultimately resulting in a delay in payment.

Availity, LLC, is a multi-payer joint venture company. For more information or to register, visit essentials.availity.com.

The mismatch is highlighted in red.

Remember: Group Name = Group NPI = Group Tax ID Number

To confirm how you are registered with Truli for Health, please call the Provider Contact Center at 833-238-8144, select option five, and then option two. If you would like to register a different Tax ID number, please complete the Provider Information Update Form available on essentials.availity.com (sections one and six). A completed IRS confirmation letter must be included.

D. Billing as an Individual Provider – OPTION Two (2)

If you are billing as an individual provider, the NPI must be the individual NPI (type 1) along with the appropriate Social Security Number. Do not enter a provider at all in the rendering section when the billing and rendering provider is the same person. Submitting redundant information can cause a different provider correctable error.

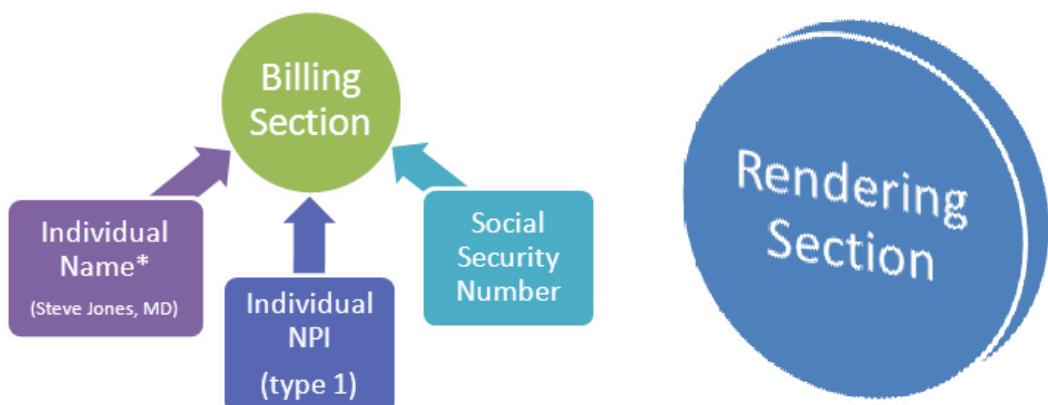

Correct Entry (THE MATCH):

This example shows how the information entered matches data registered with Truli for Health. Individual Name matches Individual NPI matches Individual Social Security Number.

Sending Coordination of Benefits Information on Electronic Claims

When Truli for Health is the secondary carrier, file the claim to Truli for Health on the member's behalf only after the primary insurance has completed processing. When Truli for Health shows another health plan is primary and there is no primary carrier payment or denial information, the claim will be returned for correction. EXCEPTIONS: Claims submitted with a GY modifier where Medicare (Fee for Service) would otherwise be primary, claims from VA/DOD facilities, Medicare Crossover claim will not be subject to these requirements.

When Truli for Health files show another health plan is primary, that information is provided on the 837 P Health Care Professional Claim response. When the primary plan is NOT Truli for Health, the following loops and segments will be required:

NOTE: When the charges, payment amount, deductible, coinsurance, co-pay or adjustment is zero, the AMT or CAS segment must still be submitted. Indicate the zero amounts as 0.

R =Required S=Situational	837 Fields	Business Requirement
S	2320 SBR01	Payer responsibility sequence may not be P Primary. The use of S or T requires other payer information in loop 2320.
S	Loop 2320 CAS 01-19, as needed	Submission of other insurance payment information requires claim adjustment group codes and associated monetary amounts. Please be sure to submit any differences between the paid and charge amounts in the CAS segments. The 837 must balance including the COB segments.

TA1 Interchange Acknowledgement Transaction

All X12 file submissions are pre-screened upon receipt to determine if the interchange control header (ISA) or interchange control trailer (IEA) segments are readable. If errors are found, a TA1 response transaction will be sent to notify the trading partner that the file could not be processed provided the file contains a code value of one (1) in the ISA14. No TA1 response transaction will be sent for error-free files.

Once Truli for Health determines that the file is readable, validation is performed on the ISA and IEA loop information. If these segments have a non-standard structure, the file will receive a full file reject and the TA1 response transaction will be sent to the trading partner, provided the file contains a code value of one (1) in the ISA14.

999 Functional Acknowledgement Transactions

¹ If the file submission passes the ISA/IEA pre-screening above, it is then checked for ASC X12 syntax and HIPAA compliance errors. When the compliance check is complete, a 999 will be sent to the trading partner informing them if the file has been accepted or rejected. If multiple transaction sets (ST-SE) are sent within a functional group (GS-GE), the entire functional group (GS-GE) will be rejected when an ASC X12 or HIPAA compliance error is found.

If the file submission passes the ISA/IEA pre-screening above, it is then checked for ASC X12 syntax and HIPAA compliance errors.
