

Chlamydia Screening in Women (CHL)

By working together, we can improve health outcomes for your patients, our members. The Healthcare Effectiveness Data and Information Set (HEDIS®) helps us measure many aspects of performance. This tip sheet provides key details of the HEDIS measure for chlamydia screening in women.

What Is the Measure?

The measure focuses on women between the ages of 16 and 24 who have been identified as sexually active and who had at least one test for chlamydia during the measurement year.

How to Improve Your Score

- Review and document the patient's surgical and preventive screenings history with results.
- Schedule the member's next appointment at new patient visit and every future visit.
- Use correct diagnosis and procedure codes.
- Submit claims and encounter data in a timely manner.
