Three Options to Choose From: Standard Option, Basic Option and FEP Blue Focus

All of our plans offer referral-free care from specialists and access to the same nationwide network of doctors and hospitals.

Standard Option gives you the flexibility to use both Preferred and Nonpreferred providers. However, your out-of-pocket expenses are lower when you use Preferred providers.

Basic Option does not have a calendar year deductible, and copayments make up most of your out-of-pocket expenses. Under Basic Option, you must use Preferred providers for all your medical care, except in certain circumstances.

FEP Blue Focus provides Core benefits that are covered at little or no cost. Your first ten doctor visits are just \$10 each. Generics and some Preferred brand name drugs are also covered. Under FEP Blue Focus, you must stay in-network to have coverage for your medical care.

Use the [compare tool](#) for more details, rates, and enrollment codes.

Drug Coverage

Each plan has its own formulary. A formulary is a list of covered prescription drugs. It includes generic, brand name, and specialty drugs as well as Preferred drugs that, when selected, will lower your out-of-pocket costs.
