

## Availity URL Change: New Address for Essentials Login

The web address for Availity Essentials™ is changing. To support a smooth transition, we are sharing information and some tips to help you prepare. Please note the following URL change:

- Old URL: apps.availity.com
- New URL: [essentials.availity.com/static/public/onb/onboarding-ui-apps/availity-fr-ui/#/login](https://essentials.availity.com/static/public/onb/onboarding-ui-apps/availity-fr-ui/#/login)

In the coming weeks, a condensed URL (**essentials.availity.com**) will be implemented. The old URL will continue to provide the same Availity access, however, users will be redirected automatically to the new login site.

The following tips can help you prepare for this transition to the new Availity Essentials web address:

1. **Whitelist the new domain:** Update your allowlist to include the new domain (essentials.availity.com) to prevent any access issues.
2. **Update hyperlinks:** Review and update any hyperlinks in documents, websites, or other materials that point to the old URL.
3. **Update technology dependencies:** If you have any technology that relies on the old URL, update it to use the new URL to avoid disruptions.
4. **Update personal bookmarks:** Update your personal bookmarks to reflect the new URL.
5. **Clear browser caches and cookies:** If you encounter any issues during the transition, try clearing your browser caches and deleting browser cookies.

If you have questions or need further assistance, contact Availity at 1-800-AVAILITY.
