100-Day Supply Prescriptions Help BlueMedicare Patients

Managing medications can be a challenge for many of your patients, especially for those with chronic conditions who need daily medicines to stay on track with their health. We encourage you to talk with your BlueMedicareSM patients about switching eligible medications to a 100-day supply.

Advantages for Patients

By filling a 100-day supply of medication, patients can save time. A greater supply reduces the need to visit the pharmacy more frequently. It also reduces the risk of running out of medication before the next refill. This can be especially beneficial for patients who live in rural areas or have mobility issues.

Medications Eligible for 100-Day Supply

BlueMedicare patients on Tier 1, 2, and 6 medications are eligible for a 100-day supply at no additional cost. Your patients may not be aware of this option or may need a prescription from you to switch to a 100-day supply.

We understand each of your patient's needs are unique and a 100-day supply may not be right for everyone. Please discuss this option with your patients as appropriate.
